

TeleNav Asset Tracker™

See your mobile assets in real time.

IMPROVE ASSET VISIBILITY

Easily keep track of your high-value assets and equipment. Enhanced by the capabilities of TeleNav's award-winning Web-based mobile resource management application, TeleNav Asset Tracker continuously reports the precise location of any item you attach it to.

BENEFITS

- **Improve asset utilization** by knowing exactly where your equipment is at all times.
- **Reduce operational costs** by ensuring your assets are always where they need to be.
- **Increase security** by knowing when your assets are on the move.

FEATURES

- **Easily configure GPS tracking** interval from the Web, from once a day to once per minute.
- **Detailed, animated maps** shows precise GPS locations allowing you to maximize asset utilization in the field.
- **Real-time tracking reports** show the actual path of moving assets on an animated map.
- **Real-time alerts** let you know when assets cross geofences or state lines, exceed speed limits: and stop for extended times. The device even notifies you when the battery is low.
- **An internal rechargeable battery** with optional hard-wire power is available.
- **Small, lightweight and portable** device requires no installation.

Specifications

- 3.4(L) x 1.9(W) x 1.3(H) inches
